
5a DC Inverter

What is the DC/AC ratio of a 5 kW inverter?

For example, a 6-kW DC array combined with a 5-kW AC rated inverter would have a DC/AC ratio of 1.2 (6 kW / 5 kW = 1.2). The key driver here is the "clipping loss": when the DC power feeding an inverter is more than the inverter can handle, the resulting power is "clipped" and lost.

What is a 5D full DC inverter air conditioner?

A 5D full DC inverter air conditioner, such as the 1.5 Ton Inverter model from Kenwood, means that all its components are DC. This can help save electricity bills due to the Smart Full DC technology.
