What is a solar panel microinverter?

Unlike centralized string inverters, which are typically responsible for an entire solar panel system, microinverters are installed at the individual solar panel site. Most solar panel systems with microinverters include one microinverter on every panel, but it's not uncommon for one microinverter to connect to a handful of panels.

Is eco-worthy micro-inverter a good choice?

Eco-Worthy micro-inverter is a very stable and reputable inverter it's ranked #4 in best sellers rank in the Solar & Wind Power inverters, you can't go wrong buying this inverter. For this micro-inverter to produce efficient results, it's necessary to pair it with a 600W solar panel.
