
Commercialization of energy storage products

Can energy storage be commercialized?

Energy storage has entered the preliminary commercialization stage from the demonstration project stage in China. Therefore, to realize the large-scale commercialization of energy storage, it is necessary to analyze the business model of energy storage.

Can energy storage be commercialized in China?

The application of energy storage ultimately depends on market demand. The commercialization of energy storage in China should find its own profit point and clarify the application scenarios and business models of various energy storage, so as to achieve long-term development of the energy storage industry.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

Should energy storage business model be negotiated?

Negotiated lease and energy performance contracting business model can transfer risk and attract more capital into the energy storage market, which can buy time for a more rational energy storage business model.
