
Dominic Flow Battery

Dominic Hey's 3 research works with 49 citations and 155 reads, including: An Exploration of Nitrogen-Rich Fused Heteroaromatic Quinones for Redox Flow Battery Applications

Recently, several projects--including Shanghai Electric Group's 5GWh all-vanadium redox flow battery project, the Washi Power sodium-ion battery base project, and ...

Invinity Energy Systems completes first phase of UK's largest vanadium flow battery project. Project set to be Europe's largest, enhancing Invinity's industry leadership. Looking for ...

Vanadium flow battery technology from the UK will be the first to go through its paces at a new energy storage test facility in the US.

We highlight the challenges and opportunities in organic redox flow battery research, underscoring the need for collaborative research efforts. The synergy between ...

By Andy Colthorpe with additional reporting by George Heynes A Western Australian government initiative to deploy the largest ...

By Andy Colthorpe with additional reporting by George Heynes A Western Australian government initiative to deploy the largest vanadium redox flow battery (VRFB) project outside ...

Dominic S. Wright's 481 research works with 10,683 citations and 9,688 reads, including: Sodium Tetrakis(hexafluoroisopropoxy)aluminates: Synthesis and Electrochemical Characterisation ...

Flow batteries are one option for future, low-cost stationary energy storage. We present a perspective overview of the potential cost of organic active materials for aqueous ...

A high-capacity-density (635.1 mAh g⁻¹;) aqueous flow battery with ultrafast charging (<5 mins) is achieved through room-temperature ...

Redox flow batteries represent a captivating class of electrochemical energy systems that are gaining prominence in large ...
