# Electricity price mechanism of Jerusalem energy storage power station

Do new energy power stations have a price mechanism?

Starting from the cost-benefit of new energy power stations, the on grid price mechanism of new energy power stations under different market environments is designed. Finally, an example is analyzed, and the following conclusions are obtained.

What is the income model of new energy power stations?

Further considering the coupling relationship between CT, PM and green card market, the income model of new energy power stations is constructed. Starting from the cost-benefit of new energy power stations, the on grid price mechanism of new energy power stations under different market environments is designed.

How a market mechanism is needed for new energy access?

With the advent of the era of parity, new energy access needs to introduce market mechanism. In the early stage of market development, new energy power generation enterprises and power grid companies do not fully understand each other's information, forming an incomplete competitive market.

Why does the power generation cost of each power generation enterprise decrease?

This is because considering the external market environment, each new energy power generation enterprise plays a game with the power grid enterprise, which urges each new energy power generation enterprise to reduce its own cost and improve its competitiveness. Therefore, the power generation cost of each power generation enterprise decreases. 7.
