Factory price bus tie breaker in Hungary

What is a bus tie breaker?

In electrical distribution systems,a bus tie breaker is used to connect two sections of an electrical bus serving different power sources. Bus tie breakers are usually open,keeping the two sections separate. When one power source fails,the tie breaker can be closed to maintain service through the section,avoiding a planned service outage.

What is a tie breaker?

A tie breaker is a type of circuit breaker that connects two sections of an electrical bus serving different power sources. They are commonly used to connect electrical systems to power sources and load circuits, as well as to protect people and equipment from overcurrents. In the context of maintenance, tie breakers offer significant advantages.
