
Generator container cabinet

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system? Put simply, yes.

What is a self-contained generator enclosure?

It utilizes shipping containers or modular structures to create a self-contained environment for generators of various sizes. These enclosures are specifically engineered to provide flexibility, mobility, and durability while ensuring the safe and efficient operation of generator systems.
