
Generator switchgear for sale in Ukraine

Who will supply generators to Ukraine?

The generators will be provided by UK commercial suppliers, who will provide their available stocks of generators to the effort. It is expected that suppliers will be able to deliver a large proportion of these generators to Ukraine via neighbouring countries.

How many generators are there in Ukraine?

This follows an initial 569 generators from 5 UK companies who have all supplied mobile units to help Ukraine. The new generators - enough to power the equivalent of around 8,000 additional homes - will be used for larger buildings such as hospitals and shelters following the brutal onslaught in Eastern Ukraine.

How to choose a generator?

The main parameter of generators is power. The user needs to calculate the total power of all devices that are planned to be connected to the generator, and add a power reserve of at least 10%. According to the obtained result, the power plant should be selected according to the nominal power produced by the plant.

What is an electric generator?

An electric generator is a device designed to convert mechanical energy into electrical energy. As a rule, the internal combustion engine acts as a source of mechanical energy. The design of the electric generator includes the generator itself, the engine and the cooling, automation and control system, which are fixed on the frame (housing).
