
Guangqian Energy Storage Project

Why is Zhejiang's pumped storage power station important?

The pumped storage power station in Zhejiang is not only a major project requiring intensive technology and capital, but also a critical measure in transforming the energy structure and promoting green, low-carbon development, said Zhu Gongshan, chairman of GCL Group.

What's happening at GCL in Shanghai?

A view of the booth of GCL during an expo in Shanghai. [Photo provided to China Daily] Full-scale construction has begun on East China's largest pumped storage power station, with power generation scheduled to start before 2030, said its operator GCL Energy Technology Co Ltd.

How much does GCL energy technology invest in Zhejiang?

The project in Zhejiang province entails a total investment of about 12.5 billion yuan (\$1.76 billion), and is the largest clean energy project invested by GCL Energy Technology.

The demonstration project is an example of China's burgeoning energy storage economy. Building on its leadership in electric vehicles, lithium batteries and solar panels, China is now ...

China's first "solar thermal energy storage + photovoltaic + wind power" demonstration project started Next article Guangqian Energy Storage Station can save enterprises nearly 1,000 ...

On July 31, at the press conference of the National Energy Administration, Bian Guangqi, deputy director of the Department of Energy Conservation and Science and ...

Recently, a number of companies--including Ganfeng Lithium Battery, KSTAR, Xinglian Energy Storage, and Huihe New Energy--have successively disclosed the latest ...

This Guangqian energy storage power station charges during the midday and evening off-peak hours and discharges during peak hours. The daily storage capacity can reach more than ...

The project is poised to enhance the region's energy mix and solidify its leadership in renewable energy adoption, playing a key role in peak-load regulation, energy storage and ...

The project is poised to enhance the region's energy mix and solidify its leadership in renewable energy adoption, playing a key role in ...

Leveraging its dominant position in electric vehicles, lithium batteries and solar panel manufacturing, China is now strategically positioned to tap into new-type energy storage ...

The Oneida Energy Storage Project is a 250MW/1,000 MWh advanced stage, stand-alone lithium-ion battery storage project, representing one of the largest clean energy storage projects in the ...

Imagine a giant power bank capable of lighting up 200,000 homes for 6 hours. That's essentially what the Naypyidaw Guangqian Energy Storage Power Station brings to Myanmar's energy ...

(Yicai) Dec. 12 -- Investment in independent energy storage projects in China has soared since the National Development and Reform Commission scrapped the previous rule requiring new ...
