How many solar panels can be installed on 1 square meter of roof

How much roof space do solar panels need?

On average, the amount of required roof space for a set of home solar panels is between 300 sq ft and 500 sq fttotal. When looking into a system for your home, the amount of required roof space will be dictated by the number of solar panels you plan to install. However, limited roof space can also limit the potential size of your installation.

How many solar panels can I install?

Although there aren't ruleson how many solar panels you can install, how they are installed is a different matter. Typically, you won't have solar panels installed within 30cm of your roof's edge; the edge of a roof isn't its strongest point.
