# How much does a Dodoma solar air conditioner cost

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

What is a split solar air conditioner?

Split solar air conditioners are an air conditioning system that uses solar energy to power the compressor and the cooling process. They consist of two main components - an indoor unit and an outdoor unit. The indoor unit is installed inside the room, while the outdoor unit is installed outside, usually on the roof or a balcony.

How many square ft can a solar air conditioner cool?

The air conditioner can heat or cool up to 750 Sq. Ft (69 m<sup>2</sup>). It is a self-cooling air conditioner that requires no grid connection. This air conditioner operates on 100% solar power and does not require batteries, an inverter, or a charge controller. It also works on grid power when the best solar conditions are unavailable.

What is a recreate solar air conditioner?
