# How much does it cost to join an energy storage power station

How much does the energy storage system cost?

The energy storage system is a 4MW,32MWh NaS battery consisting of 80 modules,each weighing 3 600 kg. The total cost of the battery system was USD 25 millionand included USD 10 million for construction of the building to house the batteries (built by Burns &McDonnell) and the new substation at Alamito Creek.

How much does it cost to install a power station?

Level 1 charging is already present in most homes or can be installed for a few hundred dollars in most cases.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030,total installed costs could fall between 50% and 60% (and battery cell costs by even more),driven by optimisation of manufacturing facilities,combined with better combinations and reduced use of materials.

What are energy storage technologies?
