
Inverter 3 kW to 12v

How much power does a 3kva inverter give?

For instance my Multiplus 3kVA give 2400W, but only 1700W if it is very warm (65 deg). The better the components used, the better the power factor, so don't expect too much from that cheap inverter you buy at that sale. On 2020/09/28 at 9:54 AM, JK844 said: 1. What does your 5kva inverter power?

Is it possible to convert a 3kva to a 1700w inverter?

There is a power factor at play and if there was no losses in conversions then it would be possible. But not in real life. For instance my Multiplus 3kVA give 2400W, but only 1700W if it is very warm (65 deg).
