
Jakarta s latest energy storage project construction

What will Jakarta's new data infrastructure look like?

In a landmark move for Jakarta's data infrastructure, the facility will also integrate a 120 MW-hour Battery Energy Storage System and draw its primary power supply from renewable energy sourced thru the JIEP collaboration, demonstrating a robust commitment to energy sustainability and climate-aligned growth.

Where did Indonesia sign a data centre deal with Aslan Energy Capital?

The deal was signed in Jakarta, the capital of Indonesia. Image: Aslan Energy Capital. Singaporean renewable energy developer Aslan Energy Capital has penned a new deal with Indonesia's Jakarta Industrial Estate Pulogadung (JIEP) to develop a 40MW data centre with a 120MWh battery energy storage system (BESS).

Why is China leading the energy storage industry in Indonesia?

China excels in energy storage due to its strong industrial base and market insights. As Indonesia enhances its energy storage innovation, collaboration opportunities between the two countries are emerging. The EESA Summit Indonesia is part of the EESA Expo 2025 in China, focusing on global integration in the energy storage industry.

What is a two-story vertical building in Jakarta?

In alignment with Jakarta's urban planning and environmental needs, the facility is designed as a two-story vertical structure utilizing modular and prefabricated components for rapid deployment and minimal construction impact.

You know, Jakarta's energy demand grew 7.2% last year while renewable integration barely reached 12% of the grid [1]. With frequent blackouts costing businesses \$380 million annually ...
