
Jordan solar Glass Power Generation Project

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation between 4 and 8 KWh/m², which implies a potential of 1400-2300 GWh per year annually.

When will a solar project start in Jordan?

Al-Shawabkeh noted that implementation of the solar project is expected to begin in January, stating that the initiative will significantly lower energy costs for factories and strengthen the global competitiveness of Jordanian products.

How much solar energy will a wind park produce in Jordan?

This wind park in Maan, a city in the South of Jordan, is supposed to produce 33 x 2 MW and to start supplying energy by the end of 2015. In Jordan, natural conditions for solar are excellent, with an intensity of direct solar radiation with 5 to 7 kWh/m²;

What percentage of Jordan's electricity is solar?

More than 20 percent of the electricity grid in Jordan is powered by solar or wind energy, with a target of 31% by 2030. Exceeding this percentage will be challenging for Jordan unless storage solutions are implemented.

Who Cares About Energy Storage in Jordan? (And Why Should You?) Let's be real - when you think of cutting-edge energy projects, Jordan might not be the first country ...

In the heart of Jordan, at Isra University, a breakthrough in glass technology is unfolding, with implications that could reshape the energy sector's approach to radiation ...

Jordan's solar PV advancements offer a compelling model for Middle Eastern nations facing energy and climate challenges. By embracing progressive policies like dynamic ...

In 2020, a solar energy project was put into operation with an installed capacity of 200 MW and following the opening of this facility the ...

JA Solar provides a 30-year warranty for linear power output of its PERC double-glass modules, ensuring the stability and high power generation of solar plants.

With the recent global increase in fossil energy prices post Covid-19 and the drive to enhance sustainability towards NetZero, renewable energy is becoming one of the key global ...

Discover how the 1.1 GW Al Hanakiyeh solar project is transforming Jordan's energy security, creating jobs, and driving its ...

The new government of Jordan has been described by analysts as progressive on clean energy. Public support for solar has already been widespread, with tariffs for home ...

A world-leading manufacturer of high-performance photovoltaic products, JA Solar, has announced that it supplied all high-efficiency PERC double-glass modules for a 67MW dc ...

IFC developed an innovative program to support the Jordanian government's first phase for the construction of solar power plants to increase renewable energy contribution to 10% of the ...

Hosha for Energy Generation International Finance Corporation (IFC), a member of the World Bank, funded the construction of seven solar plants in Jordan, Hosha for Energy ...

Renewables now supplying more than 25% of the country's power, with numerous mid-size solar and wind projects built in past five ...
