# Kenya Mombasa wind and solar storage solar container terminal

How can the port of Mombasa transition to green energy?

Technical support for a feasibility study to identify viable green energy solutions at the Port of Mombasa lays a major foundation for such a transition. This project shall create new job opportunities around green technologies and renewable energies and associated value chain resulting in increased income levels and poverty reduction.

How many tCO<sub>2</sub>e does Mombasa port emit?

A study conducted by Trademark Africa in 2023 estimated the volume of emissions at the Port of Mombasa to be 532,424 tCO<sub>2</sub>e. The Kenya Ports Masterplan 2018 - 2047 outlines climate change mitigation and adaptation as a critical environmental concern for future port development and operations.

Why is the port of Mombasa a fossil fuel based port?

The Port of Mombasa is no exception as it primarily utilizes fossil fuel-based equipment and fleet to support its port operations. This is part of the larger global challenge where Maritime and shipping activities have contributed approximately 3% to global GHG emissions.

Where is the port of Mombasa located?

The project will be implemented in the Port of Mombasa Geographically Located on 4°02'18"S, 39°38'39"E along the East African coastline. The Port is a major gateway to East and Central Africa frequented by ships with cargo bound or originating from its hinterland and neighbouring small island states.

Will Mombasa become East Africa's solar energy hub? As coastal winds meet abundant sunshine, Kenya's second-largest city is positioning itself as a testing ground for innovative energy ...

Project title: Solar Powered Cold Ironing for Port of Mombasa Project location: Kenya Client: Confidential Project Summary: As part of the ...

A new study looking at the usage of PV-powered cold ironing in the largest port in East Africa has concluded that small-scale solar plants could be crucial to reducing - or ending - greenhouse ...

Kilifi fishermen get fishing nets from former Kenya Maritime Authority chairman Hamisi Mwaguya /BRIAN OTIENO Fishermen in Mombasa and Kilifi counties are set to benefit ...

ABL Group has investigated two potential sites for the installation of a solar photovoltaic (PV) plant to generate renewable ...

ABL Group has investigated two possible brownfield sites for the installation of a solar photovoltaic (PV) plant to generate renewable energy powered shore power - or 'cold ...

A feasibility study conducted by energy and marine consultancy ABL Group has investigated two possible brownfield sites for the installation of a solar photovoltaic (PV) plant ...

Project title: Solar Powered Cold Ironing for Port of Mombasa Project location: Kenya Client: Confidential Project Summary: As part of the Green Ports Policy by the Kenyan Ports ...

The Port of Mombasa's green transition efforts include harnessing renewable energy sources. This directly contributes to Kenya's goal of generating 100% of electricity from ...

---

Energy and marine consultancy ABL Group has identified two potential brownfield sites for the installation of a solar photovoltaic (PV) plant to generate renewable energy ...

SunContainer Innovations - Imagine a coastal city where sunlight fuels factories, schools, and hospitals 24/7. That's the future the Mombasa Photovoltaic Energy Storage System Project is ...

ABL Group has investigated two potential sites for the installation of a solar photovoltaic (PV) plant to generate renewable energy from onshore power, or 'cold ironing', in ...
