What is an uninterruptible power supply?

An uninterruptible power supply is designed to deliver clean, continuous power to connected loads, preventing downtime, data loss, and equipment damage caused by surges, outages, or voltage fluctuations.

What is a ups & how does it work?

What is a UPS? Uninterruptible power supply or UPS provides instantaneous backup power when there is a loss of power supply from the mains supply or if the voltage level drops. This ensures computers or equipment can be shut down safely, or switched over to power supplied by a generator.

Who do you partner with for uninterruptible power supplies?

We only partner with suppliers who meet our stringent supply chain standards for quality (ISO 9001), health and safety (ISO 18001), and environmental management (ISO 14001). Browse our full selection of uninterruptible power supplies or contact us today if you have any questions regarding our range. Call 0800 088 5412
