## Manila export solar panel prices

How much do solar panels cost in the Philippines?

The cost of solar panels in the Philippines varies based on property type and other factors. For commercial properties, prices typically range from PHP20,000 to PHP30,000 per kilowatt, while residential installations usually cost between PHP30,000 and PHP50,000 per kilowatt.

Are solar panels a good investment in the Philippines?

Yes, investing in solar panels is a good idea in the Philippines. With the right system, our clients experience 30% to 70% savings on their electricity bills, with some even reaching a zero bill. The payback period for a solar system in the Philippines is typically between 3 to 5 years, after which the savings go straight to your pocket.

How much does a photovoltaic panel cost in the Philippines?

The Philippines photovoltaic market is dominated by Asian producers of PV panels, whose panels are usually cheaper than their European counterparts. The most popular brands include Longi, Jinko, Trina Solar and Risen. Their 300-watt panels usually cost Php 7,068 to Php 11,308.

Where to buy cheap solar panels in the Philippines?

The cheapest offers of solar panels in the Philippines can usually be found in online stores or solar equipment distributors. There we can find opportunities for panels from lesser-known brands at promotional prices. However, when buying a very cheap panel, you should be careful about unfair offers and contraband.
