# Milan Energy Storage Project Italy

Does Italy need energy storage?

The partnership's growth aligns with Italy's accelerating renewable energy expansion, and thus need for energy storage. According to Terna, the Italian transmission system operator, the country added 2.9GW of wind and solar capacity in 2022, 5.7GW in 2023, and another 5.4GW in the first nine months of 2024.

How much energy does Italy need?

The 187MW project in Piemonte will be submitted for approval later this year. Terna (the Italian TSO) estimates in the last Adequacy Report for the Italian Electricity System that Italy will need around 27GW of energy storage capacity by 2033 to add a planned 120 GW+ of renewable generation to the Italian grid.

Which projects have been submitted to the Italian Ministry of energy?

The 111MW project in Lombardia and the 97MW project in Puglia have been submitted to the Italian Ministry of Energy for approval. The 187MW project in Piemonte will be submitted for approval later this year.

How much wind and solar capacity does Italy have in 2022?

According to Terna, the Italian transmission system operator, the country added 2.9GW of wind and solar capacity in 2022, 5.7GW in 2023, and another 5.4GW in the first nine months of 2024. BW ESS executive director Roberto Jimenez said: "Deepening our partnership with ACL Energy allows us to significantly scale our development activities in Italy."
