Is there a solar power system in Myanmar?

In Myanmar, there are solar-powered battery charging stations, solar lighting, solar home systems, and village solar minigrids. However, there is no data available on their overall capacity and extent.

What are photovoltaics used for in Myanmar?

In rural areas, photovoltaics are used for charging batteries and pumping water. 70% of the Myanmar population live in rural areas. Myanmar's opened its first solar power plant in Minbu, Magway Division, in November 2018. It can produce as much as 170MW of electricity.

What is Myanmar's Solar potential?

In the short- to medium-term, off-grid solar home systems and mini-grid solar /solar/hybrid projects aim to connect households in remote locations where the costs of grid access are prohibitively expensive. The Asian Development Bank estimates Myanmar's potential solar resource at 27 GW. To date, very little of this potential has been realised.
