## New Media Portable Power Supply

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

Which portable power station should I buy?

If you need your portable power station to support days of off-grid adventure (and maybe backup your home power), check out the Jackery Explorer 2000 Plus. This power station is our favorite heavy-duty option due to its impressive output (3000W max and 6000W peak) and expandable capacity (up to a whopping 24kWh).

How to choose a portable power supply?

Now, there is a lot to take into consideration when you are looking for a portable power supply. The battery type and battery capacity will determine how long your supply will run and how much it can charge. You also have to take into account for what type of wattage the supply is rated, since this will help to determine what you can power with it.

Why should you buy a portable lithium power station?

There are now plenty of premium portable lithium power stations that offer versatility and are equipped with useful features such as USB ports, solar panel input, wireless charging and more. Whether for home or your camp outdoors, a portable power station provides you with backup power.
