## On-site installation of container generator

What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system? Put simply, yes.

How do you install a generator set?

Connect the generator set to a lifting device and crane. Move and align the generator set with the concrete mounting studs. Install attaching hardware (washer, lock washer, nut). Fuel generator tanks. Connect generator output to the Automatic Transfer Switch (ATS). 22 GPH at 25% load &#247; 1600 gallons = 72 hours of operation.

On-site systems minimize that risk. PSA nitrogen generators produce nitrogen from atmospheric air using carbon molecular sieve materials that selectively capture oxygen, ...
