
PV panels installed on pvc tile roofs

Can a PV system be installed on a tiled roof?

Both systems are available as top-fix and side-fix. In short: the mounting of the rail system on the tiled roof can be done from above as well as from the side. But no matter which of our pitched roof mounting systems for installing a PV system on a tiled or plain tile roof you choose: all systems are particularly easy and efficient to install.

What is roof-solar tilted PVC?

Roof-Solar Tilted PVC allows solar panels to be installed on the roof in such a way that the added load on the building structure is as low as possible. The pre-assembled rails with the PVC retaining strips are thermally welded to the PVC synthetic membrane. Ballasting is therefore not required.

What is roof solar tilted PVC photovoltaic mounting?

Roof-Solar Tilted PVC photovoltaic mounting is a resistant solution that has undergone several tests to be certified by a New Technology Survey (Enquête de Technique Nouvelle - ETN) by Alpes Contrôles: resistance to climatic loads, watertightness, condensation, corrosion resistance.

What is the best solar panel mounting system for pitched roofs?

If you're looking for a solar panel mounting system with a system for pitched roofs with roof tiles, ValkAce by Van der Valk Solar Systems is the solution.

Solar panels on tile roofs need special care. Learn how to install solar safely and effectively using the right methods and materials.
