
Philippines energy storage project successfully connected to the grid

Which NGCP power plant will connect to Luzon grid?

The facility will connect to the grid through NGCP's 69 kV Naga-Libmanan transmission line. The ERC also approved Megasol Energy 1 Inc.'s 41.244 MW Gamu Solar Power Plant in Isabela. The project will connect to the Luzon grid through the 69 kV Gamu-Roxas line.

What are the biggest solar projects in the Philippines?

Among the largest is Visayas Cleanergy Inc.'s 416.102 MW solar facility in Cadiz, Negros Occidental, paired with a 390.254 MWh BESS. Mainstream Renewable Power Philippines Corp. follows with a 375 MW wind project in Mindoro, and Northern Sun Power Inc. with a 351.436 MW solar farm in Ilocos Norte, paired with 337 MWh of storage.

Will MERALCO PowerGen develop a solar-plus-battery network in the Philippines?

Image: Meralco PowerGen Corp., Terra Solar Philippines Inc. ERC, the energy regulator of the Philippines, has approved an application from the world's largest solar-plus-battery project under construction to develop and own its own transmission network.

How many megawatts is Sapang Balen 2 solar power plant in Pampanga?

The approvals cover over 600 megawatts of clean energy capacity across solar, wind, and battery technologies. Among the largest initiatives is the 463.995-megawatt Sapang Balen 2 Solar Power Plant in Pampanga, which was developed by Sapang Balen Solar Second Energy Corporation.

Recently, the highly anticipated MTerra Solar project, the largest solar-storage initiative in the Philippines, secured grid connection approval from the Energy Regulatory ...

The Project will support smart grid expansion and improvement in grid flexibility in the Philippines to foster the energy system's capacity to attain the Government's goal to ...

Briefing A new hybrid solar and battery storage project in Alaminos, Philippines, is significantly enhancing grid stability and increasing renewable energy reliability. This initiative ...

The Energy Regulatory Commission (ERC) has just approved numerous renewable energy and battery storage projects with the goal of strengthening the Luzon grid, ...

The Philippine Department of Energy (DOE) has cleared 21 battery energy storage system (BESS) projects for system impact studies (SIS) with the National Grid Corporation of ...

The Energy Regulatory Commission (ERC) of the Philippines has given the MTerra Solar Project permission to develop its own dedicated transmission facilities and connect to ...

The Energy Regulatory Commission (ERC) has just approved numerous renewable energy and battery storage projects with the goal of ...

Recently, the MTerra Solar project, the largest solar energy storage project in the Philippines, has officially received grid access approval from the Philippine Energy Regulatory ...

The Philippine Department of Energy (DOE) has cleared 21 battery energy storage system (BESS) projects for system impact studies ...

The MTerra Solar Project, located across Nueva Ecija and Bulacan on Luzon island, will feature 3.5GW of solar capacity and 4.5GWh of battery energy storage. Developed ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting ...

The Energy Regulatory Commission of the Philippines has granted grid connection approval for the 3.5 GW MTerra Solar project. The approval allows the development of a dedicated point-to ...
