# Portable emergency power supply series recommendation

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

What should you consider when choosing a power station?

The last and lowest-weighted section to consider is portability. While we chose to weigh it for our overall score, the portability of a power station is often a byproduct of budget or preference. We did this intentionally to better compare portable stations against each other, rather than a portable station compared to an extra-large solution.

Can a power station be used as an uninterruptible power supply?

Yes, a power station can be used as an uninterruptible power supply, but with a big caveat. Many stations have automatic switchovers that reform the power sine wave in 20ms. Most dedicated UPS devices have a switchover of <5ms.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

Compare the best portable power stations for emergencies. Find safe, quiet backup power solutions for outages - from critical devices to full-home support.
