Pretoria foldable solar panel dimensions

How big are solar panels in South Africa?
For residential South African homes,the average solar panel size is generally between 1.6 to 1.8 meters tall and around 1 meter wide. The physical dimensions of solar panels depend on the type of solar cell technology used.

How are solar panels measured?
Solar panel sizes are measured in two ways: watt output and physical dimensions. Physical dimensions refer to the height,length and width of the solar array. The wattage refers to how much power the panel can produce. Regular solar panels come in 60 cell panels or 72 cell panels.

How big should a solar panel be?
The solar cells vary,but the size of the individual cells are always 6 x 6 inches. Because the number of panels differ,some solar power systems will be larger and heavier than others. The typical American home will need a solar array that occupies 375 to 429 square fee t. You can place it on the roof or anywhere on your property.
