# Replacing a breaker in China in Tajikistan

Why does Tajikistan need interconnecting power systems?

In the case of Tajikistan, it provides a bigger market to which it can sell its hydropower surpluses. In energy security terms, interconnecting power systems offers a more diverse energy supply and reduces the impact of disruptions.

Can Tajikistan trade electricity with other countries?

Tajikistan has several options to directly or indirectly trade electricity with other countries as these markets develop. It is important to note that the benefits of cross-border electricity trade are rarely distributed equally among countries.

How would a multilateral electricity market work in Tajikistan?

Multilateral electricity markets would provide several options for Tajikistan to increase revenue. In addition to the current practice of seasonal surplus electricity sales through bilateral arrangements, daily or weekly surpluses could also be sold in day-ahead or week-ahead markets.

How can Tajiki power sector improve cross-border trade?

Effective cross-border trade depends on a reliable power sector at the domestic level. Sustainability of operations, transparency and effective regulation are important to reinforce the functioning of the Tajiki power sector, which can boost confidence among trading partners in more integrated markets.
