What happened in Samoa?

Problems began on February 23 when the country's main high voltage (HV) underground cable failed between the Fiaga and Fuluasou power stations causing a blackout on the island of Upolu, the second largest in the Samoan islands area, impacting 200,000 people. This event was followed by a second failure on February 25.

Recently, a number of companies--including Ganfeng Lithium Battery, KSTAR, Xinglian Energy Storage, and Huihe New Energy--have successively disclosed the latest ...
