
Slovenia on supporting new energy storage

How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

What is happening in Slovenia's energy transition?

People and communities in Slovenia's energy transition is emerging strongly. The government and local energy companies are increasingly engaging with communities through consultative processes and collaborative projects that not only address the energy needs but also

What is the Slovenian energy policy?

The purpose of the measure is to accelerate the deployment of investments in renewable energy production and energy storage, with the aim to foster the transition to a net-zero economy. The Commission found that the Slovenian scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework.

How to invest in the renewables sector in Slovenia?

Investment in the renewables sector has been dependent on the availability of financing mechanisms. The Slovenian Energy Agency is the competent authority for tenders for the feed-in support scheme. Power plant operators, awarded by public tender, may choose between guaranteed purchase and operating premium.
