
Solar lights in home basements

Can solar tubes light a basement?

In contrast, solar tubes can direct daylight at an angle through multiple layers in a building. That is why solar tubes can even light up a basement. Skylights are typically squarish and hard to miss when you walk into a room. In contrast, solar tubes can come in a wide array of permutations in design.

What is the Best Lighting for a basement remodel?

In basement remodels the basement lights can make or break the entire atmosphere. But the truth is that there's no universal best lighting for every basement. Instead, the lighting needs to fit the specific basement and its layout, usage, and decor. That means there are almost unlimited options for lighting a basement.

Is there light in a basement?

There's no lightlike natural light, but it can be hard to come by in basements. If you have a walkout or daylight basement, it's much easier to get light from outside. These basements feel more open, and you can have complementary interior lights for evening hours.

Are basement lights a good idea?

For many people, the word "basement" conjures up images of a place that's dark, damp, and dingy. While there are plenty of unfinished basements that fit that description, finished basements can actually be bright, warm, and inviting. In basement remodels the basement lights can make or break the entire atmosphere.
