# Solar powered large circulating water pump

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks--without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

Is a solar water pump a good choice?

In full sun, the solar panel powers the system effortlessly, making it a great low-maintenance solution for keeping plants healthy. It's a great option for gardeners looking for an eco-friendly, hands-off watering system, especially in sunny climates. Get the Jiyang solar-powered water pump at Amazon.
