
Solar roof solar tiles

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar roof tiles worth it?

Solar roof tiles, also known as solar shingles or solar slates, are a relatively new green energy technology. For those committed to sustainable energy generation and wanting to have a solar-powered home, solar roof tiles are worth considering as an alternative to solar panels. What are solar roof tiles? Conclusion:

What is solar roof tile?

Solar Roof Tile designed by ANU is for single groove designed Mangalore Tiles and can be used for all types of Solar Power Applications. We have also kept the rates at par with conventional panel along with mounting structure so that there is not much of an incremental cost to switch over to Solar Roof Tile.
