
The function of the uninterruptible power supply for CT equipment is

Why do hospitals need an uninterruptible power supply (UPS)?

That's why we're proud to offer our uninterruptible power supply (UPS). Our UPS provides an uninterrupted power supply to hospitals and other medical facilities, protecting critical equipment, data, and personnel since 2001 for over 500 projects. With our UPS, hospitals can rest easy knowing that their power source is secure and dependable.

What types of medical equipment require uninterrupted power supply?

Radiology: Radiology equipment such as CT Scanners, MRI machines, and X-Ray machines require uninterrupted power supply to prevent any loss of data. Hemodialysis Center/Room: Hemodialysis is a medical procedure that is used to remove waste and excess fluid from the blood of patients with kidney failure.

What types of imaging systems does Gooden ups offer?

The company offers a range of other imaging systems, including PET/CT, SPECT/CT, and X-ray systems. Gooden UPS protects CT scanner, PET-CT, MRI, X-ray, Ultrasound, DSA, DR, RT, XR, IVD and other medical equipment from power outage and current spike damage in hospital, health care center, clinic and medical center.

What is a medical ups & how does it work?

A UPS protects your medical equipment by instantly powering it once a surge or outage occurs. The UPS prevents imaging equipment from shutting down for a short period. This allows for you to save what you were working on, and safely shut the system down. This ensures no data loss as well as no harm comes to patients or equipment.

The most common types of UPS are standby/offline, line-interactive, and double conversion online. All are used to achieve the ...
