
The price of solar panels installed on the roof of residential houses

How much does a residential solar system cost?

Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400. Regional pricing differences, the system size, local installation costs, inclusion of home battery backup, and local incentives are other factors which affect the final cost.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does a solar roof cost?

For example, Tesla Solar Roof costs around \$75,000 for a complex design. However, if you have a smaller home or want to install only a few integrated solar shingles, you might be able to finish your project for as little as \$15,000, with all fees included. A solar roof can save you money on your energy bills, so you recoup the cost in the long run.

How much do solar panels cost if I do a DIY installation?

A DIY solar installation will cost somewhere between \$9,000 and \$15,000, depending on the system size and equipment used. When you install solar yourself, you don't have to pay labor costs, customer acquisition costs, or installer profit margins.
