
Tokyo Solar Panel Inverter

Why do Japan import solar inverters?

Solar inverters, essential for converting DC electricity (produced by solar panels) into usable AC electricity, are imported into Japan at a 0% duty rate. This lower tariff helps keep the cost of adopting solar energy systems affordable for businesses and consumers in Japan.

Does Tokyo have rooftop solar?

Starting April 1, 2025, Tokyo became the first Japanese city to mandate rooftop solar on all new homes built by large-scale homebuilders. Tokyo's residences typically have smaller roof areas, making rooftop solar system design challenging.

Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt(kW). Are there subsidies for installing solar panels in Japan?

Our Inverter and Services for Installers Directory in Tokyo is an invaluable resource for customers seeking accurate information about Inverter and Services for Installers in Tokyo. With a ...
