
USA New York Energy Storage Project

What is New York State's energy storage goal?

New York State is targeting the installation of 1,500MW of energy storage by 2025 and 3,000MW of energy storage by 2030 as it closes in on its 100% clean energy policy goal.

What is energy storage in New York?

Affordable and dependable energy for all New Yorkers. Energy storage is a smart and reliable technology that helps modernize New York's electric grid, helping to make the grid more flexible, efficient, and resilient.

Will energy storage improve air quality in New York State?

Doreen M. Harris, President and CEO, NYSERDA said, "Accelerating the adoption of energy storage across the state will allow more wind and solar energy to be integrated into our electric grid, while improving air quality for many communities historically impacted by fossil fuel-generated pollution."

Will New York State become a major hub for energy storage?

Dr. M. Stanley Whittingham, Distinguished Professor at Binghamton University and Nobel Laureate in Chemistry for his development of lithium-ion batteries, said, "The new Energy Storage Roadmap released today will further bolster New York State as a major hub for the energy storage industry."

From the UK to the UEA and USA to Australia, Energy Digital Magazine runs through 10 of the most impressive energy storage projects ...
