# Uruguay outdoor power brand new field

What's new in Uruguay?

But there have been some notable additions. Towering white wind turbines and glistening solar panels are now as much a part of the iconography of Uruguay as the grass itself, though they began to pop up across the country only in recent years, and seemingly all at once.

Does Uruguay have a power grid?

The map of Uruguay's electrical grid today is starkly different from that of 2008, when the majority of power was generated at a few hydroelectric dams north of Montevideo and the rest at a handful of fossil fuel plants in the capital. It's now possible for the entire grid to run several hours a day entirely on wind power.

How many homes can a wind farm power in Uruguay?

In 2011 and 2012, the two leftists watched as onshore wind farm proposals finally poured in at competitive prices. This time around, the tenders resulted in the potential to power nearly 1.2 million homes solely with wind power--nearly every residence in Uruguay.

Should Uruguay transition to renewables?

Since 2019, energy has become a significant export for Uruguay, with some years bringing in hundreds of millions of dollars in revenue. In most of the world, when anyone mentions the need to transition to renewables, climate change dominates the public discussion.

Uruguay achieved 98% renewable electricity in just 15 years--without subsidies or aid. Discover the strategy behind it, and how EcoSync is applying this model globally.
