# Victoria Solar PV Panels

How many solar panels will Victoria need in 2035?

Victoria's 2035 renewables target is forecast to require 27 million solar panels raising concerns over end-of-life management, with a government modelling forecast that tonnages of photovoltaic system e-waste will increase around 20% per annum over the next decade.

Is Victoria a good place to install solar panels?

Even with fewer sunny days than northern states, Victoria is a great place for solar with state government rebates complementing federal incentives for residential solar installations. With Victoria's Solar Homes Program providing some of the most generous rebates in Australia, installing solar panels is more affordable than ever.

How much do solar panels cost in Victoria?

The cost of solar panels in Victoria typically ranges from \$4,500 to \$9,000 for a standard 6.6kW system after government rebates. Factors affecting price include system size, panel quality, installation complexity, and additional features like batteries.

Is Victoria able to process solar panels?

The report says Victoria lacks an established and proven capacity to process solar panels beyond basic processing of recyclable components, such as aluminium frames.
