# What is the current price for installing solar panels

How much does a solar panel installation cost?

Solar panel installation costs vary depending on system size, brand, labor, and additional features like energy storage. On average, solar panels cost between \$2.50 to \$3.50 per watt, with total project costs typically ranging from \$15,000 to \$25,000. Adding features like battery storage can raise costs by another \$5,000 to \$10,000.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does solar cost?

After applying the 30% federal tax credit, net costs typically range from \$10,500 to \$24,500. Understanding solar costs requires grasping two key metrics: cost per watt and cost per kilowatt-hour (kWh).

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.
