What is a wind turbine converter & inverter?

Connect with engineers across the globe, help solve technical challenges, and share knowledge with each other. Converters and inverters in wind turbines control several important functions and require power semiconductors of the highest quality.

How MPPT inverter can be used for wind turbine & solar panel?

This inverters have several MPPT inputs could be used for wind turbine and solar panel. A battery bank can be connected on the inverter to store the energy produced by the energy source (wind and solar). The energy will be stored in the battery firstly, then power the load. Extra energy will be transmitted to the state grid.

What is a micro converter?

Micro Converter 1kW/ 2kW This converter combines the wind controller and grid-tied inverter. The wind turbine AC voltage will be connected on the converter directly. A dump load resistance which is also connected on it is used for limiting the RPM of the wind turbine.

What type of inverter can be used on Aeolos wind turbines?

It can be used on Aeolos 1kW, 2kW, 3kW, 5kW and 10kW wind turbine system with CTW inverters. The dump load resistance is combined in one box and isolate with the control panel. In the premise of safety, it saves the installation space. Micro Wind Converter and Wind-Solar Hybrid Storage Inverters Micro Converter 1kW/2kW
